Sony products are reliable and affordable and there are options for any home or budget. They range from computers and professional technology to consumer electronics and home entertainment systems. Item ID: 00028220 / Last modified: 08/05/2020 If the battery for the headphones is not saving a charge, there may be a loose connection or a battery problem. Try to make the following steps to solve this problem: check that the power adapter for the transmitter is plugged into a workout CA. Before the other end of the AC power adapter is connected to the DC IN in the transmitter. Put the headphones in The transmitter so that the load pins in the transmitter make contact with the connectors in the headphones. A green charge indicator will turn on when the battery is loaded. The hours required to fully charge an empty battery varies according to the model. A 3.5-hour loading time is required for a MDRF985RK, while some models such as MDRF970 / 925RK should have up to 16 hours, so when fully loaded, the green load indicator should be released to the transmitter. If there is no charge indicator, try plugging the transmitter into a different CA shot, just to make sure there is no problem with the first output. Keep sure the battery is completely loaded. If applicable, try the battery performance. Earring in the Battery Age, try to replace the battery with a new one. The troubleshooting steps listed above must solve your problem. If you have completed all steps, including trying a different battery or if you want to replace the built-in battery of a wireless headset, the headphones may need service. Go to product repair.
